

BEAUTI-MULCH™ :

Recycled organic matter

BeautiMulch is made from clean green yard waste that has achieved high temperatures to kill seed and breakdown organic matter. The high temperatures destroys odor and produces a rich black color and texture.

BeautiMulch is rich in organic matter and will improve the structure of a wide range of soil types. When using any composted soil conditioner, implementing a well-managed fertilizer is recommended for best results. BeautiMulch has a nutrient value and organic content that helps produce high yielding, healthy plants.

BEAUTI-GRO™ :

Versatile-Organic-Productive

Beauti-Gro™ is the perfect soil conditioner for gardens and general landscaping. Even potted plants and greenhouse containers thrive with Beauti-Gro™. Made with composted steer manure and bark, Beauti-Gro™ is rich in nutrients, odor free and evenly textured with a natural dark color.

Beauti-Gro™ Improves Every Soil Adding nutrients such as Nitrogen, Phosphorus and Potassium, Beauti-Gro™ invigorates even undernourished and depleted soils. The organic fiber added by the bark aerates the soil and improves water retention. When using any composted soil conditioner, implementing a well-managed fertilizer is recommended for best results.

An excellent soil conditioner for gardens, Beauti-Gro's™ high nutrient value and organic content helps produce high yielding, healthy plants. An enriched, natural-looking mulch. Beauti-Gro™ benefits any type of soil. By aerating clay type soils and improving water retention in sandy soils, Beauti-Gro™ helps control drainage problems.

The high temperature of the composting process that Beauti-Gro™ undergoes destroys odor and produces a dark rich, natural color and texture. It works equally well as a mulch in flower beds, around shrubs or in – or outdoor potted plants.
