

## Walt's Rainy Pacific NW Blend 7-4-9

Walt's Rainy Pacific NW Blend 7-4-9 is a regional all-purpose organic fertilizer registered and approved for use in organic agriculture by the WSDA (Washington State Department of Agriculture).

Soils around the country differ due to geology, climate, and historical usage. Soils west of the Cascades are typically in short supply of nitrogen and phosphorous. The soil here is frequently acidic. Boron and sulfur deficiencies are not uncommon. pH balanced Walt's Rainy Pacific NW Blend is suited for the prevailing soil conditions of the rainy areas in the Pacific Northwest. Supplement with Limestone Flour where a more neutral soil pH is desired.

Application rate: 2-5 pounds per 100 sq. ft.

Directions:

Established or existing plantings:

If the area is dense with foliage and access is limited, take handfuls of Rainy Pacific NW Blend and toss it with a sweeping motion into the plants as evenly as possible.

Planting time:

Work into planting area prior to seeding or transplanting.

Guaranteed analysis:

Total Nitrogen (N).....	7%
0.5% nitrate nitrogen	
6.5% water insoluble nitrogen	
Available Phosphoric Acid (P <sub>2</sub> O <sub>5</sub> ).....	4%
Soluble Potash (K <sub>2</sub> O).....	9%

Derived from:

[Fish meal](#), [crab meal](#), [kelp meal](#), [fish bone meal](#), and [mined gypsum](#).

**STORAGE & DISPOSAL:** Store in a cool dry location away from direct sunlight and animals.
